PROFESSIONAL SUMMARY

Python and backend developer with 3+ years of experience building scalable REST APIs, SaaS platforms, and AI/ML-powered applications. Shipped production systems using FastAPI, Django, PostgreSQL, Redis, and Docker. Built LLM-based tools with RAG pipelines, OpenAI API, and Pinecone vector DB. Also worked full-stack with React.js. I take ownership, write clean maintainable code, and love solving real engineering problems

TECHNICAL SKILLS

Languages: Python, JavaScript, Java, PHP, HTML, CSS
Frameworks: FastAPI, Django, Flask, React.js, Express, Bootstrap
Databases: PostgreSQL, MySQL, MongoDB, Redis, Pinecone
AI/ML: LLMs, RAG, NLP, OpenAI API, Pandas, NumPy
DevOps & Tools: Docker, Git, CI/CD, Linux, AWS, Postman
Architecture: Microservices, SaaS Platforms, REST APIs

PROFESSIONAL EXPERIENCE

Python Developer | GetSetHome, Mumbai

January 2025 - Present

- Built an end-to-end multi-tenant SaaS platform with license-based feature control, IP whitelisting, and secure Linux server deployment.
- Migrated legacy PHP system to Python (FastAPI) and developed scalable backend architecture (non-microservices, improved modular structure).
- Developed AI-powered WhatsApp bot & sales chatbot using LLMs for property search, visit scheduling, and automated customer handling.
- Created a Gmail-like email automation system with AI-based smart replies, round-robin API key handling, and tag-based template workflows.
- Implemented AI-driven property description & SEO content generation using AI agents.
- Managed Google Analytics migration and backend performance tuning.

Software Developer | Softaculous, Mumbai

December 2021 - October 2022

- Developed scalable WordPress plugin and REST APIs using PHP, MySQL, and JavaScript, supporting 100K+ users.
- Built and maintained WordPress plugins, including web builder and email (SMTP) integrations.
- Used Python for automation, data processing, and API integrations, reducing manual effort in backend operations.
- Developed Django-based internal tools and admin dashboards for monitoring, reporting, and managing system data.
- Optimized backend performance and database queries, improving load time and overall system efficiency.

WordPress Developer | WebPerfecto, Mumbai

October 2022 - October 2023

- Built 15+ WordPress websites with custom PHP and MySQL integrations, improving client engagement by 30%.
- Created responsive and user-friendly interfaces using HTML5, CSS3, and Bootstrap, reducing bounce rates by 20%.
- Automated deployment workflows and streamlined release processes, cutting deployment time by 25%.

KEY PROJECTS

SaaS-Based Email Automation System

Technologies: Python, FastAPI, React.js, PostgreSQL, Redis, AWS, Docker, Linux

- Developed a multi-user SaaS platform to manage and automate large-scale email campaigns with secure authentication and role-based access.
- Built backend APIs for sending, scheduling, and tracking emails, along with dashboards for monitoring campaign performance and analytics.
- Designed a scalable backend architecture to efficiently handle high-volume email data, user management, and campaign logs.

ChatyZone: AI-Powered Document Assistant

Technologies: FastAPI, React.js, PostgreSQL, Pinecone, OpenAI, Tesseract.js

- Built an intelligent document assistant using a RAG (Retrieval-Augmented Generation) pipeline, where relevant document chunks were retrieved using vector embeddings and then passed to the LLM for context-aware answers.
- Integrated OCR processing for scanned PDFs and implemented semantic search, achieving ~95% text retrieval accuracy.
- Designed chunking, embedding storage (Pinecone), and optimized retrieval logic to improve response relevance.
- Reduced document review time by 40% while supporting 100+ concurrent users through scalable FastAPI backend architecture.

Stock Market Analyzer and Predictor

Technologies: Django, Python, LSTM, Machine Learning

- Built real-time stock analyzer with LSTM models predicting prices with 75% accuracy
- Designed interactive charts with AJAX for seamless real-time vs predicted price comparison

EDUCATION

Master of Computer Applications (M.C.A.)

October 2023 - October 2025

Parul University, Vadodara | CGPA: 8.44/10

Bachelor of Computer Applications (B.C.A.)

August 2019 - May 2022

K.P.B Hinduja College, Mumbai | CGPA: 8.48/10

CERTIFICATIONS & ACHIEVEMENTS

- DSA, Data Communication & Protocols (NPTEL)
- Recognized as Best Performer in Tech Team at GetSetHome
- Participated in Amazon AI/ML Hackathon (worked on entity extraction from images using computer vision concepts)
